To Whom It May Concern,

We have worked with Damiano Barile Engineers for a large majority of our firm's existence, close to 30 years. In that time we have collaborated on a diverse range of projects, including both new construction, additions and renovation work.

Their technical expertise in the design of various building systems has always been outstanding. Their thoroughness in preparing contract documents and in coordination of the various construction disciplines has been exemplary.

We look forward to continuing our long standing relationship with Damiano Barile Engineers and have no reservations in recommending them to our clients or associates for any projects they may be contemplating.

Very truly yours,

  
John D'Angelo, A.R.A.  
Executive Vice President
